T+2 SETTLEMENT CYCLE

November 26, 2018

*One Step Towards
A Better Efficiency*

ABOUT T+2

T+2 Settlement Cycle (T+2) denote that the seller must deliver the purchased security and the buyer must make payment on the 2nd Exchange Day after the occurrence of the Exchange Transaction which can be seen as follows :

WHY T+2

One of the market practices adopted by various Stock Exchange globally is to shorten settlement cycle. In order to implement Global Best Practices, IDX, KPEI, and KSEI has been considered to reduce its own settlement cycle to meet international standards.

T+2 BENEFIT

1. Settlement Process Efficiency

T+2 encourages market player to streamlines their settlement process, and lower operational cost in the long run.

2. Aligning with leading global settlement practice

Most of Global Exchanges from European, Asia Pacific, and American Market have already shortened their settlement cycle to T+2.

3. Enhance liquidity in the Market

With shorter settlement cycle, securities that investor purchased can be resold in less time.

4. Enabling capital to be freed up faster for reinvestment

With shorter settlement cycle, Seller will also receive funds one day sooner, realize gains faster, and also easier to switch investment to other instruments.

5. Reduction of counterparty and market risks

Shortening Settlement Cycle also will help to mitigate market risk and reduce risk exposure between transacting parties and the Clearing House itself.
